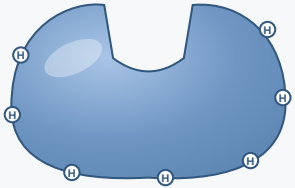
1 Receptor

held fixed

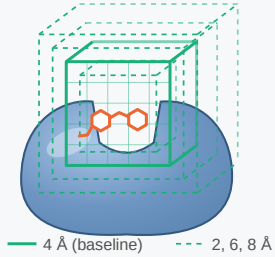


Hydrogens added at pH 7.4,
cofactors removed (no waters in the set)

2 Ligand

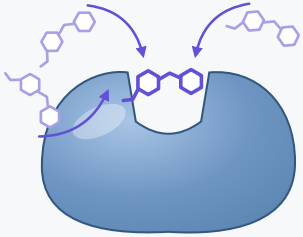
Varied: protonation, start conformer

3 Search space



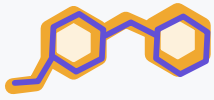
Box around the crystal ligand

4 Docking



Four engines, nine poses each

5 Evaluation

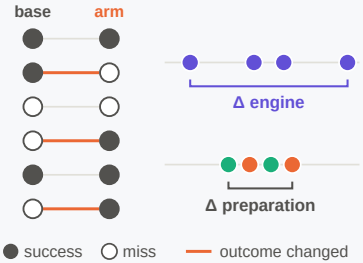


RMSD < 2 Å ✓

bonds · angles · clashes · planarity

Top pose vs crystal pose (amber);
PB-valid if it passes PoseBusters

6 Compare, by complex



Each arm vs its baseline, paired
